PRD – Premium Laundry & Home Appliances Online Store

Nov 7, 2026 · @ActionPulse.ai

1. Overview & problem statement

We are building a mobile-first online store that sells premium laundry appliances in Kenya, led by MIKA front-load washers, washer-dryer combos and heat-pump dryers, with fridges, microwaves and an entry-level washer range as secondary categories. Success means turning online interest into paid orders, showroom visits and financing enquiries, not just page views.

The problem. Premium machines in this category sell at around KSh 100,000 and above (e.g. a MIKA 10kg wash / 7kg dry combo, model MWAFCV3310BDS, is shelf-priced at KSh 114,995). Buyers at that price:

- Do not understand the feature labels on the machine (SpaCare steam wash, BLDC inverter motor, A+++, heat pump) or why they justify the price.
- Want to talk to a person, see the machine, and be sure the warranty is genuine before paying.
- Often need to spread the cost through instalments.
- Research on their phone, usually via Instagram, TikTok, Google or WhatsApp, then message before buying.

Most local appliance sites are catalogue-only: a photo, a price and a cart. They don't explain, don't reassure and don't route the buyer to a salesperson at the moment of doubt.

The product. A store that educates (technology explainers, buying quiz, comparison), reassures (warranty, installation, reviews, showroom) and converts through the channel each buyer prefers: online checkout, WhatsApp, a phone call, a showroom booking or a financing request.

Product name: [Store Name] (placeholder until branding is confirmed).

2. Goals, success metrics & non-goals

The store succeeds if it produces qualified sales conversations and paid orders at a measurable cost per lead. Targets below are proposed starting points to be confirmed after the first 60 days of data.

Business goals

1. Generate a steady flow of qualified enquiries (WhatsApp, call, form, showroom booking) for premium laundry machines.
2. Close paid orders online and through WhatsApp, with M-Pesa or Pay on Delivery.
3. Make financing visible so price is not the reason a buyer drops off.
4. Build organic search presence for high-intent queries ("MIKA washing machine price Kenya", "washer dryer combo Nairobi").
5. Give the owner a simple admin to run products, prices, stock and orders without a developer.

Success metrics (proposed)

Metric	Definition	Proposed target (first 90 days)
Lead conversion rate	Leads (WhatsApp click, call click, form, booking) ÷ sessions	3–5%
Order conversion rate	Paid or confirmed orders ÷ sessions	0.5–1%
Lead-to-order rate	Orders ÷ qualified leads	15–25%
Financing enquiries	Instalment form submissions per month	Track baseline
Mobile page speed	Largest Contentful Paint on 4G, mid/low Android	Under 2.5 s
Organic traffic	Sessions from Google search per month	Grow month on month
Admin self-sufficiency	Product/price updates done without developer	100%

Non-goals (v1)

- Multi-vendor marketplace or third-party sellers.
- Full card payment gateway (added later if volume justifies it).
- Native mobile app.
- In-house credit scoring; financing is routed to a partner.
- Spare-parts store and repair booking (later phase).
- Delivery outside agreed zones without a manual quote.

3. Target users & personas

The primary buyer is an urban, mobile-first household upgrading to a premium automatic machine; every flow is designed for a phone first.

Persona	Who they are	What they need from the site	Main conversion path
Apartment professional	28–40, Nairobi apartment, no space or time to line-dry	Washer-dryer combo, size that fits, quiet operation, delivery and installation	WhatsApp → M-Pesa
Growing family	Household of 4–6, high laundry volume	10–12kg capacity, hygiene (steam wash for baby clothes), running cost	Comparison → showroom visit or financing
Upgrader from twin-tub	Owns a twin-tub, wants automatic	Plain explanation of what changes, water and power needs, price justification	Buying quiz → WhatsApp
Gift / diaspora buyer	Buying for parents in Kenya, often abroad	Trust, clear delivery to a named address, receipt and warranty	WhatsApp or call → online payment
Budget buyer	Wants a reliable machine near KSh 30–40K	Entry-level range, Pay on Delivery	Cart checkout or WhatsApp
Store admin (internal)	Owner or sales staff	Update products, prices, stock; see and act on orders and leads fast	Admin panel + WhatsApp notifications

Shared constraints: mostly on Android phones, some on low-end devices and patchy data; prefer WhatsApp to email; trust M-Pesa; expect to negotiate or ask questions before paying.

4. Scope & release phases

The MVP launches the full selling loop for laundry machines (browse, learn, ask, pay, deliver); everything else waits until real orders show what to build next.

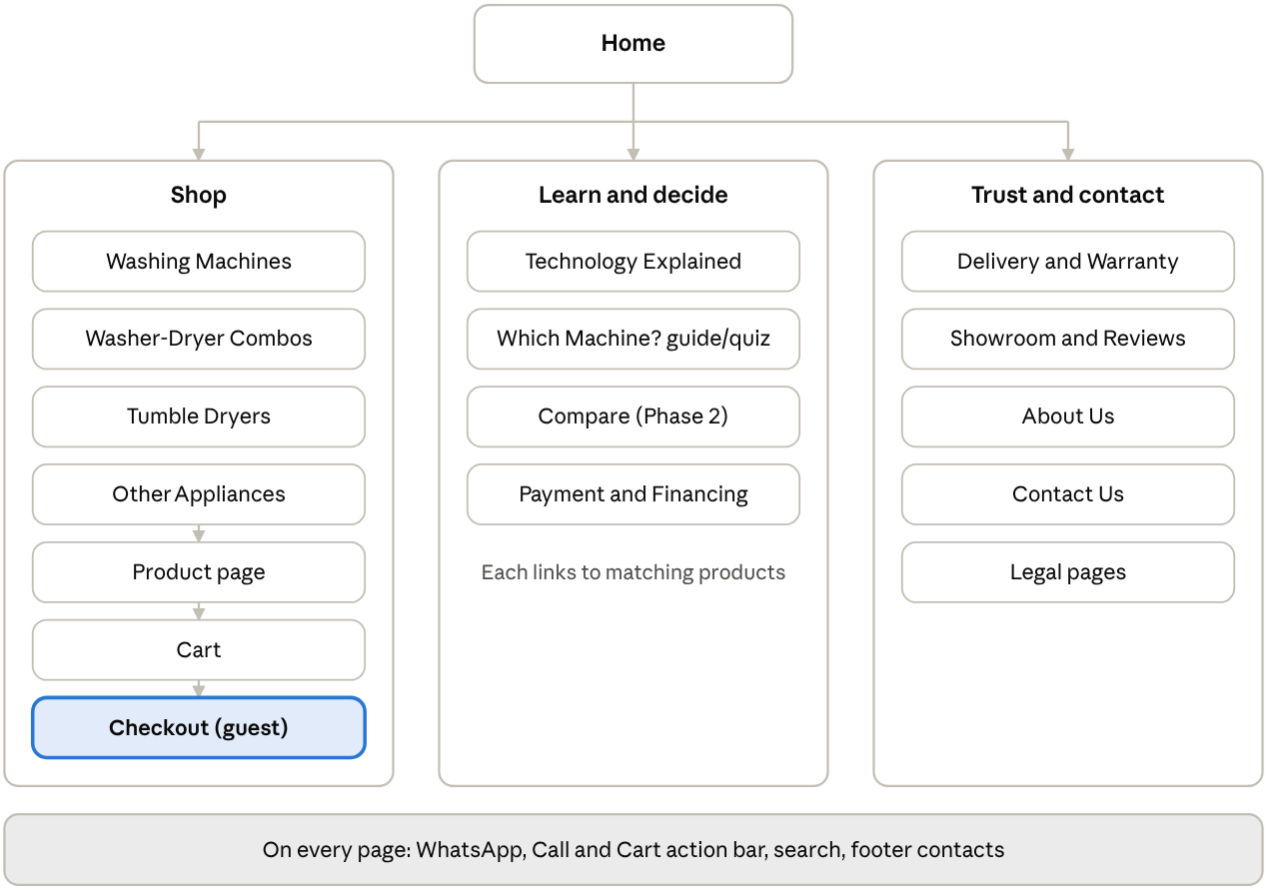

Capability	MVP (Phase 1)	Phase 2	Phase 3
Catalogue	Washers, combos, dryers + basic other appliances	Full fridges/microwaves range	Spare parts, accessories
Product pages	Photos, specs, price, warranty, CTAs	Product video, 360° view	User Q&A
Education	Technology Explained page, buying guide	Interactive "Which machine?" quiz	Blog / SEO content hub
Comparison	—	Compare up to 3 machines	Saved comparisons
Checkout	Cart, M-Pesa Till/Paybill (manual confirm), Pay on Delivery	M-Pesa STK Push (Daraja API) auto-confirm	Card payments
Financing	Instalment enquiry form	Partner integration (e.g. bank / lipa-pole-pole provider)	Online pre-approval
WhatsApp	Pre-filled order button on every product	WhatsApp Business catalogue sync	WhatsApp API order updates
Showroom	Location, map, booking form	Calendar slots with SMS reminders	—
Reviews	Admin-added reviews + installed-unit photos	Verified buyer reviews	—
Admin	Products, prices, stock, orders, leads	Offers/coupons, delivery zones	Reports dashboard
Analytics	GA4 + Meta Pixel + CTA click events	Conversion API, funnel reports	—

Out of scope for all phases (unless re-decided): marketplace sellers, native app, in-house lending.

5. Site map & information architecture

The site has three paths under Home (shop, learn, trust), and all of them point the buyer to a product page, a WhatsApp chat or checkout.

Every route from Home ends in a product page, a chat or checkout

site map · 3 paths, 16 pages

Main navigation (mobile menu, in this order): Washing Machines · Combos · Dryers · Other Appliances · Which Machine? · Payment Options · Showroom · Contact.

6. Functional requirements by page

Every page carries a persistent mobile action bar (WhatsApp · Call · Cart) so a buyer can reach a person from anywhere in one tap. IDs (FR-x) are for tracking in build tickets.

Global

- FR-1 Sticky header: logo, search, cart count, menu.
- FR-2 Sticky bottom action bar on mobile: WhatsApp, Call, Cart.
- FR-3 Floating WhatsApp button on desktop.
- FR-4 Footer: contacts, showroom address, opening hours, payment logos (M-Pesa, Pay on Delivery), warranty/returns links, social links.
- FR-5 Site search by product name, brand, model number (e.g. "MWAFCV3310BDS") and capacity.

Home

- FR-6 Hero banner: steam-wash / washer-dryer message, one primary CTA ("Shop washing machines") and one secondary ("Ask on WhatsApp").
- FR-7 Trust strip: genuine warranty, free delivery & installation (zones), flexible payment, showroom.
- FR-8 Featured models carousel (admin-selected), current offers, category tiles (Washers, Combos, Dryers, Other appliances).
- FR-9 "Which machine is right for me?" entry block and short reviews block.

Washing Machines (category)

- FR-10 Grid of product cards: photo, name, capacity, key badge (e.g. "Steam wash", "Washer-dryer"), price, stock status, WhatsApp button.
- FR-11 Filters: type (front-load, washer-dryer, top-load), capacity (8–12kg), features (steam wash, inverter motor, dryer function), price range, brand.
- FR-12 Sort: popular, price low–high, price high–low, newest.
- FR-13 "Add to compare" toggle on each card (Phase 2).

Washer-Dryer Combos and **Tumble Dryers**

- FR-14 Category intro block explaining who the product is for (apartments, no line-drying; heat-pump = lower power, no vent pipe, gentle drying), then the same grid and filters.

Other Appliances

- FR-15 Sub-categories: fridges, microwaves, entry-level washers; same card and grid components.

Product page

- FR-16 Image gallery (zoom, swipe) and optional product video.
- FR-17 Title, brand, model number, price, offer price (if any), stock status.
- FR-18 Key spec block: capacity (wash/dry), type, spin speed (RPM), energy rating, motor type, warranty.
- FR-19 Feature icons linking to the Technology Explained anchors (SpaCare, BLDC, auto-dose, microfiber catcher, drum clean, heat pump).
- FR-20 CTAs: Buy Now, Order on WhatsApp (pre-filled), Call, Book Showroom Visit, Ask about instalments.
- FR-21 Delivery & installation estimate by area; what's in the box; installation requirements (water inlet, drain, socket).
- FR-22 Full spec table, dimensions, and downloadable manual/brochure (if supplied).
- FR-23 Reviews and related products.

Technology Explained

- FR-24 One section per feature: plain-language name, one visual, what it does, the benefit (cleaner, cheaper to run, quieter, lasts longer), and "machines with this feature" link.

Which Machine Is Right for Me?

- FR-25 MVP: written guide by household size and space. Phase 2: 4–5 question quiz (household size, space, need drying?, budget, priority) returning 1–3 recommended models with CTAs.

Payment Options

- FR-26 Explain M-Pesa (Till/Paybill), Pay on Delivery (zones and conditions), instalment options; link to financing form.

Delivery, Installation & Warranty

- FR-27 Delivery zones and fees table, timelines, installation process and site requirements, warranty terms per brand (incl. 10-year motor warranty where applicable), returns policy, after-sales contact.

Showroom & Reviews

- FR-28 Showroom photos, address, hours, embedded Google Map, booking form; customer reviews with photos of installed units.

About Us / Contact Us

- FR-29 Business story and dealer status; contact page with phone, WhatsApp, email, map and enquiry form.

Legal pages

- FR-30 Terms of sale, privacy policy (Kenya Data Protection Act compliant), returns & refunds.

7. Commerce: cart, checkout, payments, financing, orders

Checkout is guest-only, one page, and asks for nothing the delivery team doesn't need; payment is M-Pesa or Pay on Delivery at launch.

Cart

- CM-1 Add/remove items, change quantity, see subtotal, delivery fee (by zone) and total in KSh.
- CM-2 Optional add-ons per item: installation (free/paid by zone), extended warranty, stand/pedestal (if stocked).

- CM-3 Cart persists on the device (no login required).

Checkout (guest, single page)

- CM-4 Fields: full name, phone (07xx/01xx validated), email (optional), delivery area (dropdown of zones), address/landmark, preferred delivery date, installation yes/no, notes.
- CM-5 Payment choice: M-Pesa or Pay on Delivery (only shown for eligible zones and below an admin-set order value cap).
- CM-6 Order summary and terms checkbox; "Place order" button.

Payments

- CM-7 MVP M-Pesa: show Till/Paybill number and the order number as account reference; buyer pays and enters the M-Pesa code; admin confirms the payment manually.
- CM-8 Phase 2 M-Pesa: STK Push via Safaricom Daraja API; callback auto-marks the order Paid.
- CM-9 Pay on Delivery: order is Confirmed after a sales call; payment collected on delivery via M-Pesa.
- CM-10 Optional deposit rule for high-value or out-of-zone orders (admin-set percentage).

Financing

- CM-11 "Ask about instalments" form on product pages and Payment page: name, phone, product, preferred plan length, employment type, consent to be contacted.
- CM-12 Submissions go to the leads list and trigger a WhatsApp/email alert to sales; partner handles approval offline in v1.
- CM-13 Show indicative monthly amounts only if the financing partner supplies approved rates; otherwise show "plans available, ask us".

Order lifecycle

Status	Set by	Customer notified
New	System on submit	Yes (SMS/WhatsApp: order received + payment instructions)
Awaiting payment	System (M-Pesa chosen)	Reminder after 2 hours if unpaid
Paid / Confirmed	Admin or M-Pesa callback	Yes (confirmation + delivery window)

Status	Set by	Customer notified
Scheduled for delivery	Admin	Yes (date + driver contact)
Delivered & installed	Admin	Yes (thank you + review request)
Cancelled / Refunded	Admin	Yes

- CM-14 Order number format e.g. ORD-2026-00123; receipt viewable via a private link.
- CM-15 Admin receives instant alert (email + WhatsApp/SMS) for every new order and lead.

8. Conversion features

Every conversion action is tracked as an analytics event and, where it creates a lead, lands in the admin leads list with its source page.

WhatsApp ordering

- CV-1 "Order on WhatsApp" on every product card and page opens wa.me/<business number> with a pre-filled message: *"Hi, I'm interested in the MIKA 10/7kg Washer-Dryer Combo (MWAFCV3310BDS) at KSh 114,995. Is it available for delivery to [area]?"*
- CV-2 Generic WhatsApp button elsewhere pre-fills the current page name.
- CV-3 Click logged as event `whatsapp_click` with product ID and page.

Click-to-call

- CV-4 `tel:` links on header, action bar, product page and contact page; event `call_click`.

Showroom visit / demo booking

- CV-5 Form: name, phone, preferred date, time slot (morning/afternoon/evening), product of interest.
- CV-6 Confirmation message on screen and via SMS/WhatsApp; admin alert; Phase 2 adds reminders the day before.

Comparison (Phase 2)

- CV-7 Compare up to 3 machines side by side: price, capacity (wash/dry), type, spin speed, energy rating, motor, steam wash, warranty, dimensions.
- CV-8 Highlight differences; CTA under each column.

"Which machine?" quiz (Phase 2)

- CV-9 4–5 questions, one per screen, progress bar, under 60 seconds to finish.
- CV-10 Rules-based recommendation (e.g. household of 5+ and needs drying → 10kg+ washer-dryer combo); result page shows 1–3 models with WhatsApp/Buy CTAs.
- CV-11 Optional "send my result on WhatsApp" captures the phone number as a lead.

Trust and urgency (honest only)

- CV-12 Stock badges driven by real stock counts (In stock / Only X left / Out of stock + "Notify me").
- CV-13 Offer badges with real end dates set in admin; no fake countdowns.
- CV-14 Reviews and installed-unit photos near the CTAs on product pages.
- CV-15 Exit/scroll prompt on product pages (once per session): "Questions? Chat with us on WhatsApp".

9. Admin panel & content management

A non-technical owner must be able to add a new machine, change a price or mark something out of stock from a phone in under 2 minutes.

Module	Capabilities	Phase
Products	Add/edit/archive, photos (auto-compressed), video link, specs from a fixed template, feature tags, category, featured flag	MVP
Prices & offers	Price, offer price with start/end date, offer badge text	MVP
Stock	Quantity per product, low-stock threshold, auto badge	MVP
Orders	List with status filter, order detail, change status (triggers customer message), add M-Pesa code, print delivery note	MVP
Leads	One inbox for WhatsApp-tracked clicks (count only), forms, showroom bookings, financing enquiries; status: New / Contacted / Won / Lost; assign to staff	MVP
Content	Edit homepage banners, Technology Explained sections, FAQs, delivery zones and fees, policies, reviews	MVP

Module	Capabilities	Phase
Delivery zones	Zone name, fee, Pay on Delivery allowed, lead time	MVP
Users & roles	Owner (all), Sales (orders, leads), Content (products, pages)	MVP
Reports	Orders and revenue by period, top products, leads by source, conversion by channel	Phase 2
Coupons	Code, value, expiry, usage limit	Phase 2

- AD-1 Every change is logged (who, what, when).
- AD-2 Admin works fully on mobile.
- AD-3 CSV import/export for products and orders.

10. Product data model & catalogue

Every product follows one fixed spec template so filters, comparison and the quiz work without manual tagging.

Product fields

Field	Type	Example
name	text	MIKA Washer-Dryer Combo 10/7kg, Silver
brand	select	MIKA
model_number	text (unique)	MWAFCV3310BDS
category	select	Washer-dryer combo
type	select	Front-load / Top-load / Twin-tub / Heat-pump dryer
wash_capacity_kg	number	10
dry_capacity_kg	number (optional)	7
spin_rpm	number	1500
energy_rating	select	A, A+, A++, A+++
motor	select	Brushless inverter (BLDC) / Standard

Field	Type	Example
features	multi-select	SpaCare steam wash, Auto-dose, Microfiber catcher, Drum clean, Baby care, Quick 15′, Heat pump
warranty	text	e.g. 10-year motor warranty (where applicable) + general warranty
price_ksh	number	114,995
offer_price_ksh / offer_end	number / date	optional
stock_qty / low_stock_at	number	4 / 2
colour, dimensions_cm, weight_kg	text / number	Silver; W×D×H
images, video_url, manual_pdf	media	—
short_benefit, description	text	One-line benefit + full copy
seo_title, meta_description, slug	text	auto-filled, editable

Seed catalogue (from the showroom photos)

Model	Type	Capacity	Spin	Energy	Notable features	Price
MIKA MWAFCV3310BDS	Washer-dryer combo, front-load	10kg wash / 7kg dry	1500 RPM	A	BLDC inverter, SpaCare steam wash, Ozone/Airwash, auto-dose	KSh 114,995 (shelf)
MIKA 12kg front-load (model no. to confirm)	Front-load washer	12kg	1400 RPM	A+++	BLDC inverter, SpaCare steam wash, microfiber catcher, 10-year warranty badge	To confirm
MIKA MDRH3110DS (to confirm)	Heat-pump tumble dryer	10kg	—	A+++	BLDC inverter, heat pump, hygiene/anti-crease, 10-year warranty badge	To confirm

The catalogue needs at least 10–15 laundry products at launch so filters and comparison feel useful; the owner supplies prices, stock and model numbers.

Other entities: Order, OrderItem, Customer (phone as key), Lead (type, source page, product, status, owner), Booking, FinancingEnquiry, DeliveryZone, Review, Offer, AdminUser, AuditLog.

11. Non-functional requirements

The site must load fast on a mid/low-end Android phone over 4G, because that is where most buyers will meet it.

Performance

- NF-1 Largest Contentful Paint under 2.5 s and total page weight under 1.5 MB on product pages (mobile, 4G).
- NF-2 Images served as WebP/AVIF, responsive sizes, lazy-loaded below the fold; videos load only on tap.
- NF-3 Lighthouse mobile score of 85+ for Performance, Accessibility, Best Practices and SEO.

SEO

- NF-4 Clean URLs (/washing-machines/mika-10-7kg-washer-dryer-mwafcv3310bds), unique titles and meta descriptions, one H1 per page.
- NF-5 Product, Offer, Review and LocalBusiness structured data (schema.org).
- NF-6 XML sitemap, robots.txt, canonical tags, Google Search Console and Google Business Profile linked.
- NF-7 Keyword-led pages and copy for: "MIKA washing machine price Kenya", "washer dryer combo Nairobi", "heat pump dryer Kenya", "12kg front load washing machine Kenya".

Security & privacy

- NF-8 HTTPS everywhere; admin behind strong passwords + 2FA; role-based access.
- NF-9 No card data stored; M-Pesa codes and phone numbers stored only as needed for orders.
- NF-10 Consent checkbox on forms; privacy policy aligned with the Kenya Data Protection Act, 2019; data deletion on request.
- NF-11 Daily backups, spam protection on forms (honeypot / reCAPTCHA).

Accessibility & usability

- NF-12 WCAG 2.1 AA basics: contrast, tap targets ≥ 44 px, labelled form fields, alt text on product images.
- NF-13 Prices always in KSh with thousands separators; English copy, with key CTAs testable in Swahili later.

Analytics

- NF-14 GA4 + Meta Pixel with events: view_item, add_to_cart, begin_checkout, purchase, whatsapp_click, call_click, booking_submit, financing_submit, quiz_complete.
- NF-15 UTM tracking on all ad and social links; Meta Conversions API in Phase 2.

Reliability

- NF-16 99.5% uptime target; uptime monitoring with alerts to the owner.

12. Tech stack options & integrations

Recommended: WooCommerce for the fastest path to a self-managed store with M-Pesa; choose the custom build only if the store must double as a showcase product or needs the quiz and lead inbox tightly built in.

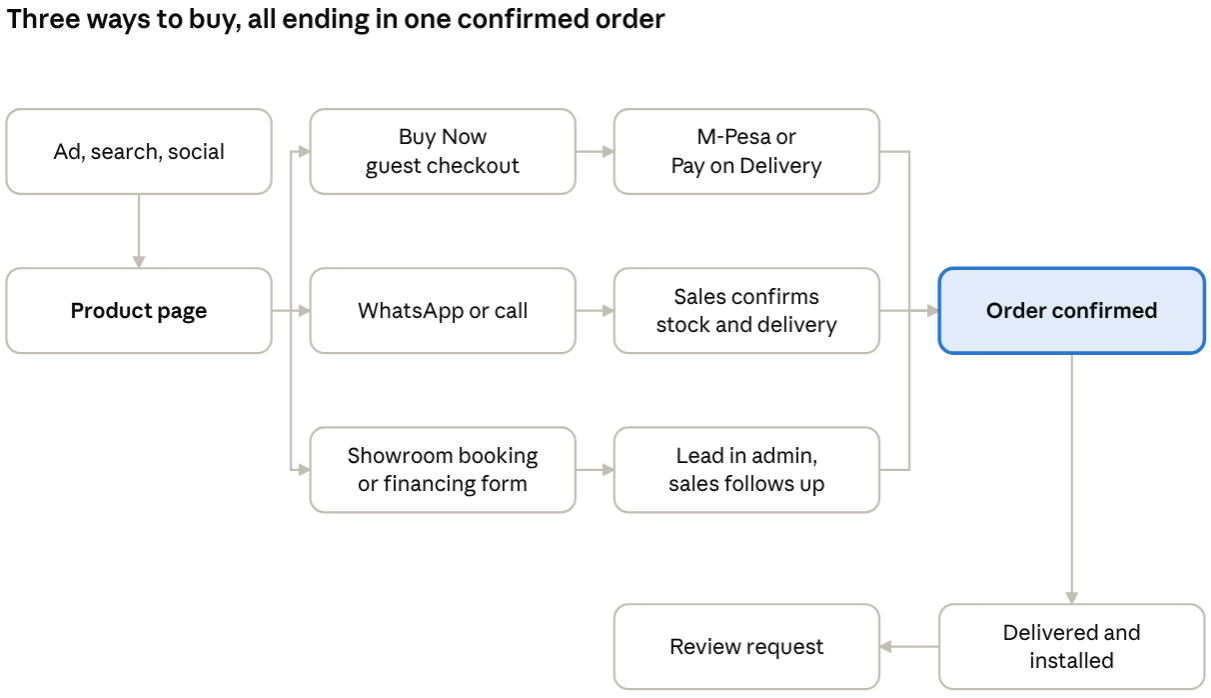

Option	Stack	Strengths	Trade-offs	Fit
A. WooCommerce	WordPress + WooCommerce, M-Pesa plugin (STK Push), WhatsApp plugin, Yoast/RankMath SEO	Owner-editable, strong SEO, many Kenyan M-Pesa plugins, low cost	Plugin sprawl, needs good hosting and caching for speed	Best default
B. Shopify	Shopify + M-Pesa payment app + WhatsApp app	Hosted, reliable, polished admin	Monthly fees in USD, M-Pesa via third-party apps, less control over custom flows	Good if owner wants zero maintenance
C. Custom	Next.js + Supabase/Postgres + Daraja API + headless CMS (e.g. Sanity) on Vercel/Netlify	Fastest pages, quiz, comparison and leads inbox built exactly to spec	Higher build time and cost, developer needed for changes outside the CMS	Best performance and flexibility

Integrations (all options)

- Safaricom Daraja API (M-Pesa STK Push + callbacks) or approved plugin.
- WhatsApp: wa.me deep links (MVP); WhatsApp Business API via a provider for automated order messages (Phase 3).
- SMS: Africa's Talking or equivalent for order and booking messages.
- Email: transactional sender (e.g. Brevo, Postmark) for receipts and admin alerts.
- Google Maps embed, Google Analytics 4, Google Search Console, Meta Pixel.
- Financing partner: referral form in v1; API only if the partner offers one.
- Hosting: managed host with Nairobi/EU proximity and CDN (e.g. Cloudflare).

13. User flows

Buyers reach a confirmed order by three routes (self-checkout, WhatsApp/call, or showroom/financing), and the store must support all three equally.

purchase flows · 3 routes to one order

Flow details

1. **Self-checkout:** product page → Buy Now → cart → checkout form → M-Pesa (enter code) or Pay on Delivery → order received message → admin confirms → delivery scheduled → delivered and installed → review request.

2. **WhatsApp / call:** product page → pre-filled WhatsApp message or call → sales confirms stock, delivery area and price → sales creates the order in admin (source: WhatsApp) → M-Pesa or Pay on Delivery → same tail as above.
3. **Showroom / financing:** booking or financing form → lead appears in admin with product and source → sales follows up within the target time → visit or partner approval → order created → same tail.
4. **Quiz (Phase 2):** quiz → 1–3 recommended models → product page or "send on WhatsApp" → joins route 1 or 2.
5. **Admin:** new order/lead alert → open in admin → update status → customer is messaged automatically.

14. Risks, dependencies & open questions

The biggest risk is not technical: it is whether the store can legitimately use MIKA branding and promise the official warranty.

Risk	Impact	Mitigation
Not an authorised MIKA dealer	Cannot use MIKA logos/claims or promise official warranty; trust damage	Confirm dealer status in writing; otherwise brand as an independent retailer and state warranty terms precisely
Prices change often	Stale prices lose trust or margin	Admin price edits in under 2 minutes; "price confirmed on WhatsApp" note
M-Pesa manual confirmation delays	Buyers wait, abandon	Phase 2 STK Push; clear payment instructions; staff alerts
Pay on Delivery fraud / no-shows	Wasted delivery trips	Phone confirmation call, zone limits, value cap, deposit rule
Slow pages on low-end phones	Lost traffic and ad spend	Performance budget (NF-1 to NF-3), image pipeline
WhatsApp leads not followed up	Interest leaks away	Leads inbox, response-time target (under 15 min in business hours), staff assignment
Thin catalogue at launch	Filters and comparison look empty	Minimum 10–15 laundry products before launch

Risk	Impact	Mitigation
Financing partner not ready	Main objection unanswered	Launch with enquiry form; sign partner in Phase 2

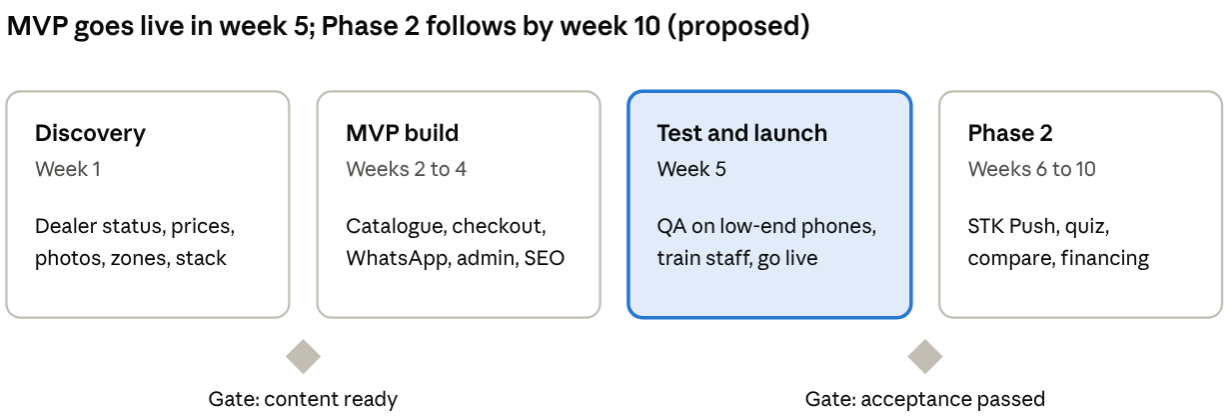

Dependencies: product photos/videos and spec sheets, final price list, delivery zones and fees, Till/Paybill numbers, Daraja API credentials (Phase 2), showroom address and hours, financing partner, domain and hosting, brand assets.

Open questions

- [ ] Are we an authorised MIKA dealer, and which other brands will we carry?
- [ ] Store name, domain and brand look?
- [ ] Is there a physical showroom, and where?
- [ ] Which delivery zones, fees and installation charges apply?
- [ ] Which financing partner(s), and what terms can we display?
- [ ] Exact warranty terms per model (general vs 10-year motor)?
- [ ] Which stack: WooCommerce, Shopify or custom?
- [ ] Who on the team handles WhatsApp leads and in which hours?

15. Timeline & acceptance criteria

The proposed plan launches the MVP in week 5, provided the owner's content (prices, photos, zones, dealer status) is ready by the end of week 1.

proposed roadmap · 4 phases, 2 gates

The build cannot start in earnest until content is in; most delays on stores like this come from missing photos and price lists, not code.

MVP acceptance criteria (all must pass before launch)

- [ ] At least 10–15 laundry products live with photos, full specs, price, stock and warranty.
- [ ] Filters (type, capacity, features, price) return correct results on the Washing Machines page.
- [ ] Every product's WhatsApp button opens a pre-filled message with model number and price.
- [ ] Click-to-call works on Android and iPhone.
- [ ] A test order completes with M-Pesa (code entry) and with Pay on Delivery; admin and customer both receive notifications.
- [ ] Order status changes in admin trigger the right customer message.
- [ ] Showroom booking and financing forms land in the admin leads list and alert sales.
- [ ] Admin can add a product and change a price from a phone in under 2 minutes.
- [ ] Product pages hit LCP under 2.5 s on a mid-range Android over 4G; Lighthouse mobile 85+.
- [ ] GA4 and Meta Pixel record view_item, add_to_cart, purchase, whatsapp_click, call_click and form submits.
- [ ] Sitemap submitted, structured data validated, Google Business Profile linked.
- [ ] Privacy policy, terms, returns and warranty pages published.
- [ ] Staff trained on admin, lead follow-up and the WhatsApp response target.
